- Payment Terms: 1% - 15 Days. Net 30.
- Unconditional Guarantee (Broken or misused tools should be replaced to your customers at no charge. Hold merchandise for replacement by area representative)
- Returned shipments are subject to a 15% restocking fee and must be accompanied by a "Permission Granted" letter issued by Northbridge Tool, LLC

## SUPERIOR QUALITY SCREWDRIVERS

- **Precision Ground**
- **Professional Quality**

### **MATERIAL**

High carbon, fine grained, open hearth tool steel guarantees high blade quality.

### **PRODUCTION**

All Enderes® bits, both Flat and Phillips types are manufactured through advanced technology and special application high precision grinding machines. Each production step is performed individually; one piece at a time.

### **TIPS**

Slotted bits have tip and flat surfaces precision ground. Phillips bits have a special precision geometry which transmits higher torque, decreases screw or screwdriver slippage and reduces ejection forces for less wear and longer edge life.

### **HANDLES**

Generous size for operator comfort and high-torque. Unbreakable acetate plastic, extrusion and turn processed, first quality grade.

### **BLADES**

Heat treated over entire length. Sand-blast shot over entire blade. Hexagon steel to apply maximum torque.

### **GOVERNMENT SPECS**

Each driver far exceeds all Federal torque test requirements for strength and durability.

### **QUALITY CONTROL**

All Enderes® screwdrivers undergo rigorous in-process and final quality control inspections. This assures Enderes® High Quality Standards.

### **ENDERES® GUARANTEE**

Because of our tight quality control, Enderes® will replace any defective item free of charge, excluding normal wear and tear or improper use. Enderes® stands behind the quality for which we are known.

# OPEN STOCK MULTI-BIT SCREWDRIVERS

The unsurpassed professional quality of our multiple bit screwdrivers makes them the handiest, most versatile, and most reliable tool available today with unlimited applications.

### 15-1 SCREWDRIVER

15 different Screw head configurations accessed by 1 unique Screwdriver, combined with the highest quality ratcheting mechanism in the industry. A "must have" in all tool boxes, R.V.'s, boats and automobiles. (15-1 ratcheting mechanism manufactured in Japan or China.)

## TACK PULLERS

Drop forged from domestic high carbon, open hearth tool steel. Individual heat-treating assures maximum strength. Allows prying against any surface without marring. Tack, nail, clip, or staple pulling notch in blade. A must for oak and other hard woods. Opens paint cans. Longer length provides additional leverage. Available carded only.

Carded Stk #	Description	Blade Length	Stock Size	Overall Length	Wt.	Std. Pkg.
0980	Tack Puller #1	3-3/4"	1/4"	7-1/4"	0.04	6

## SCREWDRIVER MERCHANDISERS

### #78 COUNTER DISPLAY

This display will show all drivers in the "stand up" position. New concept in displaying ... calls attention to the blade, not the handle. The 13 drivers displayed should cover 80% of your screwdriver requests. 6 of each in the display; 78 total screwdrivers.

## PROFESSIONAL BULK POWER BITS

- High Carbon, Open Hearth Tool Steel
- Industrial Quality
- Individually Heat-treated

**At last, a tougher, longer lasting Power Bit! Enderes® special precision tip geometry transmits higher torque into the screw, resulting in a decrease in the screwhead slippage, a reduction in the ejection forces, thus giving low wear, and longer tip life. Some available carded or in a variety of pieces counter displays.**

- All bits are manufactured in Taiwan at a high quality ISO 9002 Certified facility. The bits are made to Enderes® exact specifications for bit tolerances and Rockwell hardness.
- The Highest Grade Tool Steel is used to insure Professional Quality and Durability.
- Wide variety of Power Bits, Sockets and Accessories to select from. All competitively priced.
- Build your own display with our space saving Rack. Wall mount or Counter Top.
- Each Bowl is labeled and UPC coded for your convenience.

- **Finest Grade Tool Steel**
- **Deep Tempered – Exclusive with Enderes®!**

### USE

Cold Chisels are used for cutting, shaping, or removing cold metals softer than the chisel itself such as cast or wrought iron, unhardened steel, aluminum, brass, or copper. Never use a Cold Chisel on concrete, stone, or a metal harder than the chisel's cutting edge.

The chisel has a cutting edge at one end, and a struck face at the other to be struck with a ball-peen or machinists hammer. Never strike with a nail hammer and never strike anywhere except the struck face.

Always strike the chisel with a light, cautious blow when starting a job to determine the relative hardness of the metal to be cut. Always wear safety goggles when using a cold chisel as well as when using all struck hand tools.

### SELECTION

Flat Chisels are the most frequently used Cold Chisels. Enderes Tools® offers them in 17 sizes from 1/4" cut to 1" cut including 12" and 18" extra length models.

### SPECIFICATION

Enderes Tools® Cold Chisels are forged and heat treated using only the finest domestic high carbon tool steel. They conform to all applicable ANSI and ASTM steel standards for materials, physical properties, and testing, including A29-79, A322-79a, A331-74 (1979), A576-79, and A681-76. Rockwell hardness range is C57-59 so your Enderes® Cold Chisel will hold its cutting edge longer and resist excessive wear.

### MAINTENANCE

A dull cutting edge may be sharpened using a common file as described in our "Maintenance" section below.

1. Always wear safety goggles when sharpening a cutting edge and when ever using a striking tool.
2. Rigidly support the tool being sharpened. Secure in a bench vise if possible.
3. Never use grinding to sharpen. This causes excessive heat and may result in a loss of strength, durability and temper.
4. Instead, use a file or stone of medium or fine grit and file away from the cutting edge. This directs heat away from the edge.
5. The original contour of the cutting edge or point should be restored. Flat cold chisels should be restored to a bevel angle of 70 degrees.

Discard any Cold Chisel if it is bent or shows dents, cracks, chips, mushrooming, or excessive wear.

## OPEN STOCK COLD CHISELS

### STANDARD LENGTH COLD CHISELS

All of our Cold Chisels are forged from the finest domestic high carbon tool steel available. Used for cutting and removing metal softer than the cutting edge itself. Individually heat treated to allow for re-sharpening with a file.

Cd. COLD CHISEL MERCHANDISER (RACK ONLY) STOCK #8100

## SUPERIOR QUALITY STONE & WOOD CHISELS

- **Finest Grade Tool Steel**
- **Deep Tempered – Exclusive with Enderes®!**

### USE

A variety of Chisels are designed for use on stone, concrete, and brick.

Mason Chisels and Brick Sets are used for scoring and cutting block and brick. Tooth Chisels are used to cut soft stone and brick, such as Bedford limestone. Bull Point Concrete Chisels are used for breaking up and drilling concrete.

All-Steel Wood Chisels, including Floor Chisels and Electrician's Chisels are for rough cutting and trimming of both hard and soft woods. They will also cut soft nails and wiring encountered while cutting these soft woods.

Strike Stone and Wood Chisels only with a ball pein or machinist's hammer. Never strike with a nail hammer, and always wear safety goggles when using struck hand tools.

### SELECTION

Brick Sets are available in 3", 3-1/2", and 4" cuts. Mason and Tooth Chisels are available in 2", 2-1/4", and 2-1/2" cuts. Concrete Chisels are available in 12" and 18" lengths. Plugging Chisels are available in 1/8" and 1/4" thicknesses.

### SPECIFICATION

Enderes Tools® Stone and Wood Chisels are forged and heat treated using only the finest domestic high carbon tool steel. They conform to all applicable ANSI and ASTM steel standards for materials, physical properties and tests, including A29-79, A322-80, A331-79, A576-79, and A681-76. All styles fall within the appropriate Rockwell hardness ranges recommended by ANSI and ASTM for their intended application.

### MAINTENANCE

A dull cutting edge may be sharpened using a common file as described in our "Maintenance" section below:

1. Always wear safety goggles when sharpening a cutting edge and when ever using a striking tool.
2. Rigidly support the tool being sharpened. Secure in a bench vise if possible.
3. Never use grinding to sharpen. This causes excessive heat and may result in a loss of strength, durability and temper.
4. Instead, use a file or stone of medium or fine grit and file away from the cutting edge. This directs heat away from the edge.
5. The original contour of the cutting edge or point should be restored. Brick Sets should be restored to a bevel of 45 degrees and Brick Chisels should be restored to a bevel of 90 degrees.

## BRICK SETS

Designed for cutting, trimming, and scoring blocks and bricks. Forged from the finest high carbon tool steel and individually heat-treated for the highest quality. Can be resharpened with a common file.

## CHISELS

### MASON CHISELS

Designed for cutting brick, cement block, cinder block and trimming off excess mortar. Excellent for raking out joints. This powerful thin blade produces very clean cuts.

Bulk Stk #	Carded Stk #	Description	Cut/Pt.	Stock Size	Overall Length	Weight Bulk/Carded	Std. Pkg.
0339	0385	B-115	2"	3/4"	7-1/2"	0.88/0.92	6

0347	0345	B-22	2-1/2"	3/4"	7-1/2"	0.90/0.93	6

### ELECTRICIAN'S CHISEL

Designed for rough cutting and trimming of hard or soft woods. Short handle accommodates tight working conditions. Used for "roughing-in" electrical outlets, etc.

Bulk Stk #	Carded Stk #	Description	Cut/Pt.	Stock Size	Overall Length	Weight Bulk/Carded	Std. Pkg.
0349	0348	B-17	2-3/4"	3/4"	8-1/2"	1.01/1.03	6

### FLOOR CHISEL

Powerful, thin cutting blade for rough cutting and trimming, removing of tongue and groove flooring, etc. Forged from the finest tool steel and individually heat treated. May be resharpened with a file.

Bulk Stk #	Carded Stk #	Description	Cut/Pt.	Stock Size	Overall Length	Weight Bulk/Carded	Std. Pkg.
0352	0350	B-18	2-3/4"	3/4"	12"	1.43/1.47	6

### FLAT BRICK CHISEL

Also commonly referred to as a "Flat Utility Chisel", this tool is forged from 3/8" x 7/8" rectangular stock steel. When combined with its 1-1/8" cutting edge, the long length enables this chisel to perform where traditional styles cannot. Available in 12", 18".

Bulk Stk #	Carded Stk #	Description	Cut/Pt.	Stock Size	Overall Length	Weight Bulk/Carded	Std. Pkg.
0281	0282	B-27	1-1/8"	7/8"	12"	1.02/1.07	6

### PLUGGING CHISEL

Designed to be used in "tuck-pointing". Removes old cement and mortar from between brick, block, etc.

Bulk Stk #	Carded Stk #	Description	Cut/Pt.	Stock Size	Overall Length	Weight Bulk/Carded	Std. Pkg.
0279	*	D-11A	1/8"	1/2"	10"	0.50	6
0280	*	D-11	1/4"	1/2"	10"	0.56	6

### CONCRETE CHISEL

Also known as a "Bull Point" chisel. Designed for breaking up concrete floors, sidewalks, etc. where it may be impractical to use an air hammer.

Bulk Stk #	Carded Stk #	Description	Cut/Pt.	Stock Size	Overall Length	Wt.	Std. Pkg.
0272	*	B-12A	3/8"	7/8"	12"	2.02	6

### WOOD AND STEEL CHISEL

Designed for rough work in wood; will also cut steel. If you are cutting wood and hit a nail, no problem. Also used for muffler and tailpipe removal.

Bulk Stk #	Carded Stk #	Description	Cut/Pt.	Stock Size	Overall Length	Weight Bulk/Carded	Std. Pkg.

STRIKE-GUARD MERCHANDISER (RACK ONLY) STOCK #8155

**ENDERES TOOL COMPANY** was founded in Albert Lea, Minnesota in 1911, the result of a merger between Albert Lea Machinery Company, which was founded in 1908 in Albert Lea, Minnesota, by Joe Pihl; and Enderes Manufacturing Company, which was founded in 1896 in Littleport, Iowa and was owned by Ernst Enderes. Enderes Manufacturing Company produced three tools – a 14" cutting nipper, a staple puller, and a drop forged cold chisel. The Albert Lea Machinery Company sold those three tools for Enderes Manufacturing Company. Sales soon outstripped production capabilities, and an expansion was required. The entire operation was relocated to a new plant in Albert Lea, Minnesota. The old octagon tool plant burned to the ground in 1966, and we built our present plant. Enderes has always been a family-held corporation. You can count on one hand, the tool companies in America that have had that long a life span that are still owned and operated by the same family. We take pride in that!

## SUPERIOR QUALITY PUNCHES & NAIL SETS

- **Finest Grade Tool Steel**
- **Deep Tempered – Exclusive with Enderes®!**

### USE

Punches are designed to punch holes in metal and other materials, mark metals, drive or remove pins and rivets, and align holes in different sections of metal. Punches are designed for use on metals softer than the punch itself and should never be used on stone or concrete.

Strike the face of the punch squarely with a ball pein or machinists hammer. Never strike with a nail hammer. Always strike the punch with a light, cautious blow when starting a job to determine the relative hardness of the material being punched. Always wear safety goggles when using a punch.

### SELECTION

Punches are classified by the shape of the taper and point. Center and Prick Punches have a sharp point for precise markings. Enderes® Center Punches are available in 7 different sizes and lengths. Enderes® Prick Punches are available in 3 sizes ranging in stock sizes from 1/4" to 1/2". Solid Punches are used before using a Pin Punch to start a pin. Enderes® Solid Punches are available in 11 sizes from 1/16" to 1/2". Pin Punches have a flat point and consistent taper and are used to remove pins and rivets. Enderes® Pin Punches are available in 16 different sizes with points ranging from 1/16" to 5/8". Alignment Punches have a long taper and flat point and are used to align holes in different

sections of metal. Enderes® Alignment Punches come in 8 different sizes with points ranging from 1/8" to 3/8".

### MAINTENANCE

A dull cutting edge may be sharpened using a common file as described in our "Maintenance" section below:

1. Always wear safety goggles when sharpening a cutting edge and when ever using a striking tool.
2. Rigidly support the tool being sharpened. Secure in a bench vise if possible.
3. Never use grinding to sharpen. This causes excessive heat and may result in a loss of strength, durability and temper.
4. Instead, use a file or stone of medium or fine grit and file away from the cutting edge. This directs heat away from the edge.
5. The original contour of the cutting edge or point should be restored. Prick Punches should be restored to 30 de-grees and Center Punches should be restored to 60 degrees. Pin, Rivet, and Alignment Punches - flat and square with axis of tool.

Discard any punch if it is bent or show dents, cracks, chips, mushrooming, or excessive wear.

### SPECIFICATION

Enderes Tools® Punches are forged, heat treated, and polished, using only domestic high carbon tool steel. They meet all applicable ANSI and ASTM steel standards for materials, physical properties and testing, including A29-9, A322-79A, A331-74 (1979), A576-79, and A681-76. All styles of Enderes® Punches fall within the appropriate Rockwell hardness range recommended by ANSI and ASTM for their intended application.

## OPEN STOCK PUNCHES

### SOLID PUNCHES

This tool is used as a starter punch before using the Pin Punch. The taper gives it extra strength. Domestic high carbon tool steel and individually heat treated to insure maximum strength and toughness.

## SUPERIOR QUALITY STAR DRILLS & SCREW EXTRACTORS

- *Finest Grade Tool Steel*
- *Deep Tempered – Exclusive with Enderes®!*

### USE

Star Drills are the forerunners of today's electric masonry drill bits. They are designed to create holes in masonry, brick, stone, and concrete. Star Drills are for hand use only. They are not to be used in power drilling equipment. The Star Drill cutting edge resembles four chisels joined at their edges to form a cross.

They are most often used today to supplement power drilling equipment. Star Drills easily cut through hard rocks, agates, and other hard materials encountered in masonry which can destroy electric masonry drill bits. Star Drills should be struck squarely with a hand drilling hammer. Never strike with a nail hammer and never use on anything but masonry. Always wear safety goggles when using Star Drills.

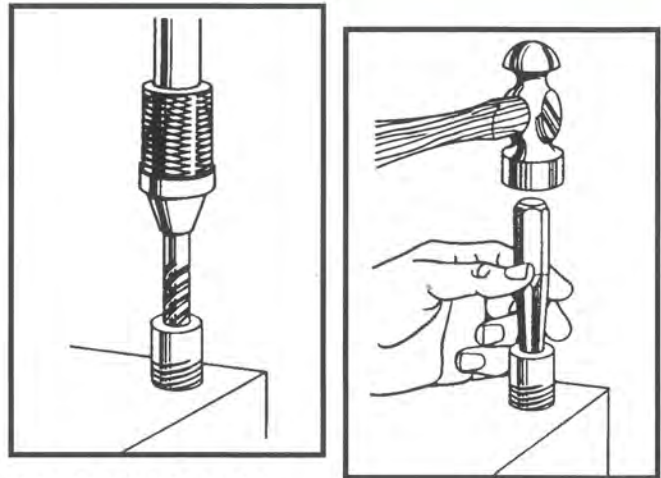

A Screw Extractor is used to remove screws, bolts, and other metal fasteners which are damaged or otherwise inaccessible through usual extraction methods.

A guide hole is drilled into the top of the fastener to be removed. The Screw Extractor is then driven into the fastener head with a ball peen or machinists hammer and turned counter-clockwise until the fastener is removed. Be sure to select a screw extractor of the appropriate size, just as you would match a screwdriver tip to the size and shape of the screw recess.

Never strike a Screw Extractor with a nail hammer and always wear safety goggles when using one.

### SELECTION

Enderes Tools® Star Drills are available in 5 different sizes and lengths with cut points ranging from 3/8" to 1". Enderes® Screw Extractors are available in 9 different sizes and lengths with point sizes ranging from 3/32" thru 5/8".

### MAINTENANCE

A Star Drill's dull cutting points may be sharpened using a common file. Be sure to maintain the original bevel. Star Drills should be discarded if they have chipped, battered, or mushroomed heads. Enderes® Screw Extractors may be redressed using a common file. Discard any Screw Extractor that is bent or shows dents, cracks, chips, or mushrooming.

### SPECIFICATION

Enderes Tools® Star Drills resist chipping and mushrooming longer than other Star Drills because they're forged, heat treated, and precision pointed. Enderes® Screw Extractors are the only forged, straight flute extractors available, so they will perform where machined or spiral-type extractors fail. In addition the tapered and straight flutes will not damage the object being removed. Enderes® Star Drills and Screw Extractors conform to all applicable ANSI and ASTM steel standards for materials, physical properties, and testing. Rockwell hardness range is C57-59.

## OPEN STOCK STAR DRILLS

Enderes® Star Drills are unique in that their flutes are the same diameter for the entire length. The flutes are extra long, allowing for many re-sharpenings with a file for exceptional tool life. No other Star Drills compare. Used for drilling holes in concrete, stone, brick, and any other similar materials. Individually heat treated and forged from the finest domestic high carbon tool steel.

## SCREW EXTRACTOR MERCHANDISERS

Made from the highest quality domestic tool steel, Enderes® Screw Extractors are the only forged straight flute extractors available on the market today. They are superior to other types because they will not chew up or expand the object being removed. The four straight chisel edges can be driven solidly into work to insure easy removal of broken objects. Gradual taper will not wedge or bind. Used to remove broken screws, studs, bolts, pipe fittings, etc.

**SINCE 1896**, the primary thrust of Enderes Tool Company has been to produce only the highest quality Struck Hand Tools. We can document and illustrate that all of our tools exceed any written specifications that have ever been generated on struck tools. One of the keys to quality is the utilization of time-honored manufacturing techniques. These "Blacksmith" techniques impart a quality to struck tools, which cannot be obtained with some of the modern mass production techniques utilized by our competitors.

**ENDERES TOOLS**

**QUALITY FORGED HAND TOOLS FOR A LIFETIME.**

## SUPERIOR QUALITY BARS

- *Finest Grade Tool Steel*
- *Deep Tempered – Exclusive with Enderes®!*

### **USE**

Pry Bars, Ripping Bars and Nail Pullers are used in construction and demolition when pulling nails, ripping wood, prying moulding and similar tasks are done. Their length and shape provide greater leverage than claw hammers and other striking tools which are not designed for prying.

Never strike the claw, or working portion, of the bar. The claw is not designed to withstand such a blow and the bar may fracture. Always wear safety goggles when using these bars.

### **SELECTION**

Most bars come as combination tools with two different end styles. This provides versatility in meeting job demands. Features usually include an extended body and a combo of either a tapered end, a nail claw or a nail pulling slot.

Longer and more sharply curved bars provide the greatest leverage for the toughest jobs

### **MAINTENANCE**

Discard any bar that is bent or has a chipped, broken claw, or rounded or dull bevel.

### **SPECIFICATION**

Since Enderes® Bars are forged only from domestic high carbon tool steel, heat treated and polished, they will resist excessive wear more effectively than any other bar. They conform to all applicable ANSI and ASTM steel standards for materials, physical properties and testing, including A-29-79, A332-80, A331-79, A576-79, and A681-76. All styles fall within the appropriate Rockwell hardness ranges recommended by ANSI and ASTM for their intended applications.

**FAX: 507-373-2398**

## OPEN STOCK BARS

### D-13 PRY BAR

Made from the highest quality tool steel available. This bar may be only 12" long but the offset in the neck enables you to achieve compound leverage. The slot is large enough to handle 30 penny nails! Made from 5/8" stock.

Bulk Stk #	Description	Stock Size	Overall Length	Wt.	Std. Pkg.
0289	D-13	5/8"	12"	1.20	6

### D-14 RIPPING BAR

Made from the highest quality tool steel available. This single end bar is forged from heavier stock than most competitors. It is used primarily for tearing, prying, and removing such things as floor tile, wall paneling, etc. Made from 3/4" stock with an overall length of 18".

Bulk Stk #	Description	Stock Size	Overall Length	Wt.	Std. Pkg.
0292	D-14	3/4"	18"	2.30	6

### D-15 DOUBLE END RIPPING BAR

Made from the highest quality tool steel available. Both working ends of this bar are completely forged and heat treated. It too, is made from 3/4" stock (most other bars on the market are made from 5/8" stock). The bent leg of this tool is longer than similar bars of its kind for increased leverage.

Bulk Stk #	Description	Stock Size	Overall Length	Wt.	Std. Pkg.
0295	D-15	3/4"	18"	2.53	6

### D-16 SPRING STEEL RIPPING BAR

Both ends of this bar are forged and heat treated. Our stock is wider and thicker than other bars on the market. The offset at the bent end makes this the ideal tool for hanging doors. Has an overall length of 14".

Bulk Stk #	Description	Stock Size	Overall Length	Wt.	Std. Pkg.
0298	D-16	1-1/2"	14"	1.57	6

### D-21 SINGLE END NAIL PULLER

This Cats Paw type puller will easily handle a 30 penny nail. This tool is heavier than most on the market.

Bulk Stk #	Description	Stock Size	Overall Length	Wt.	Std. Pkg.
0315	D-21	5/8"	10"	1.10	6

### D-22 MINI BAR

This bar can be used in all applications that our D-16 Spring Steel bar is used. The bar has an overall length of 9-1/2".

Bulk Stk #	Description	Stock Size	Overall Length	Wt.	Std. Pkg.
0318	D-22	1-1/2"	9-1/2"	0.40	6

### D-23 COMBINATION TOOL

Made from the highest quality tool steel available. This double ended bar combines the valuable Cats Paw type puller with the useful pry bar qualities. Made from 5/8" stock with an overall length of 15".

Bulk Stk #	Description	Stock Size	Overall Length	Wt.	Std. Pkg.
0316	D-23	5/8"	15"	1.53	6

### D-24 DOUBLE ENDED NAIL PULLER

Made from the highest quality tool steel. This tool is a double ended Cats Paw type tool. Both ends allow you the flexibility to pull headless nails up to 30 penny at almost any angle! Fully forged and heat treated. 5/8" stock with overall length of 10-1/2".

Bulk Stk #	Description	Stock Size	Overall Length	Wt.	Std. Pkg.
0317	D-24	5/8"	10-1/2"	1.07	6

### D-26 MOULDING TOOL

This double ended bar is invaluable for removing corner and baseboard mouldings. Both ends are forged, heat treated, and polished. Made from 1/2" stock with an overall length of 10". No carpet layer should be without one!

Bulk Stk #	Description	Stock Size	Overall Length	Wt.	Std. Pkg.
0319	D-26	1/2"	10"	0.65	6

### D-36 MINI CHAMP BAR

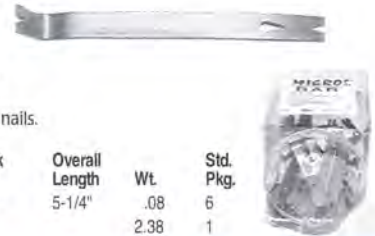

Our D-36 Mini Champ Bar is identical in appearance to our D-16 Spring Steel Ripping Bar with only a 6" overall length. No home should be without one in their tool box or "junk" drawer. Ideal for opening, scraping, prying, and applying siding.

Bulk Stk #	Description	Stock Size	Overall Length	Wt.	Std. Pkg.
0302	D-36	1"	7-1/4"	0.30	6

### D-37 MICRO UTILITY BAR

This Micro Utility Bar looks just like our D16 Spring Steel Ripping Bar with only a 5-1/4" overall length. A must for every Toolbox and Utility drawer. Ideal for removing small tacks, brads and finishing nails.

Bulk Stk #	Carded Stk#	Description	Stock Size	Overall Length	Wt.	Std. Pkg.
0300	0301	D-37	1/2"	5-1/4"	.08	6
0919	*	30 pc. Bowl			2.38	1

### HEAVY DUTY CONSTRUCTION BARS

Offset claw angle allows close quarter work. Heavy duty length for increased leverage.

Bulk Stk #	Description	Stock Size	Overall Length	Wt.	Std. Pkg.
0651	D-27	5/8"	14"	1.38	6
0653	D-28	7/8"	24"	4.5	6
0654	D-29	7/8"	30"	5.6	6

### MONSTER PAW BARS

Another Enderes first. A one of a kind combination offset claw angle for close quarter work and catspaw type design rotated 90 degrees for lower angle work. 3 different lengths to meet your needs.

Bulk Stk #	Description	Stock Size	Overall Length	Wt.	Std. Pkg.
0659	D-72	5/8"	12"	1.18	6
0663	D-82	5/8"	18"	1.76	6
0665	D-92	5/8"	24"	2.32	6

### WRECKING BARS

These "goose neck" style bars are forged from domestic carbon tool steel. The curved head end includes a slotted claw for removing nails while the "Pinch" end is like a flat chisel for prying and lifting. Available in 4 lengths from 18" to 36".

Bulk Stk #	Description	Pinch End	Stock Size	Overall Length	Wt.	Std. Pkg.
0650	D-30	7/8"	5/8"	18"	1.96	6
0656	D-33	1-1/16"	3/4"	24"	3.65	6

### ROLLING HEAD PRY BARS

The unique head design on this bar serves as a fulcrum providing additional leverage. Often used in close quarters or tight situations where the extra strength of the forged head is needed. The tapered, pointed end is used for aligning applications.

Bulk Stk #	Description	Stock Size	Overall Length	Wt.	Std. Pkg.
0678	D-17	7/16"	12"	0.43	6
0679	D-18	9/16"	16"	0.64	6
0680	D-19	11/16"	20"	0.80	6

### BENT TIP PRY BARS

Designed to perform the heavy duty leveraging and prying tasks where screwdrivers are too often misused. Forged and heat treated for toughness and durability. Large screwdriver type handles offer comfortable grip and aid in leverage potential.

In addition to the bent tip style bars, Enderes® offers an 18" screwdriver style blade. In addition to performing as a pry bar, this tool can double as an extra length screwdriver when needed.

Bulk Stk #	Description	Stock Size	Overall Length	WL	Std. Pkg.
0682	D-40	7/16"	7"	0.65	6
0684	D-41	7/16"	12"	0.91	6

### #726 CONSTRUCTION BAR CENTER

Get your Construction Bars off the bottom shelf and hanging at eye level for maximum sales. The bars are attached to an attractive card that contains point of sale references and allow you to hang some construction bars that are not normally allowed to hang. All the tools are backed by a planogram that identifies the tools for reorder and also secures a permanent spot in your store.

When you reorder to refill your #726 Display, make sure to add the letter "C" to the standard bar part number. This will insure that you get the hang card, along with the proper bar.

Display measures 18" W x 22" H and contains 26 total tools made up of 8 different bars.

## # 234 COUNTER DISPLAY

**A BEAUTIFUL MERCHANDISER!**

*Just one turn per year will earn you a profit of over \$270.00 per square foot!*

**36" LONG x 10" DEEP . . . 2.5 square feet**

41 different tools in this display...all proven sellers! Featured in this stand up merchandising concept, this display is not only compact, but also gets struck tools off the wall and out of bulk bins. Makes re-ordering easy and creates a massive appearance for your tool department. Displays and inventories 6 of each tool with the exception of the 3 Cutting Nippers and the 3 longest Cold Chisels.

# WILL YOUR TOOLS STAND THIS TEST? ENDERES® WILL!

ACTUAL UNTOUCHED PHOTO -  
ENDERES® TOOLS THROUGH  
1/4" ANGLE IRON!

**TRUTHFULLY,**  
don't you hate buying "bargain price" tools that never seem to complete their intended job?

**REMEMBER,**  
price is forgotten when a tool fails to hold an edge, chips or breaks. Even if you never put your tools through a test like 1/4" Angle Iron, isn't it nice to know the quality is there for the tough jobs. Especially when it costs just a few cents more.

**ENDERES TOOL® GUARANTEES . . .**  
all their tools to out perform the others. We give a full replacement guarantee if one ever fails its designed function. So, when spending money on Struck Tools, spend it wisely . . .

**BUY ENDERES®!!!**

For over 100 years, the employees manufacturing Enderes Tools have dedicated themselves to manufacturing only the finest quality tools available on the market today.

In November 2012 we re-opened as Northbridge Tool LLC under new management with a renewed commitment to customer service and quality. We are proud to say that we were able to hire back almost all of the employees in the manufacturing plant including the plant manager. They are all highly skilled, well trained, very conscientious employees with over 200 years of combined experience in the forging and heat treating of metal tools.

At Enderes Tools, we feature a unique manufacturing process in which each tool is individually heat treated to produce an edge that is unsurpassed for keenness and durability. Should the working edge ever become dull from repeated use, the process allows the tools to be re-sharpened with a common file, in accordance with all of the latest safety standards.

We know that you have many choices when purchasing your hand tools. We ask only for the opportunity to earn your business with the unsurpassed quality of our "Made in the USA" Enderes brand tools.

Steven R Overgaard  
President, C.E.O.
